Cart Solutions Featuring CLINiC™

CareLink™ Mobile Telepresence Cart

- 7″ glass touchscreen for ease-of-use and individual preference setting
- Intelligent Platform with remote fleet management and onboard calculator
- Onboard messaging software for sending communications
- Electronic lift with 15″ range of motion
- N-Stride Steer Assist for effortless maneuvering and control

T38 Telemedicine Cart

- Electronic lift with 12″ range of motion
- Ample primary work surface of 21″ w x 16″ d
- Universal I/O panel for peripheral device integration/management
- Electronic Keyless Entry
- Secure technology cabinet vented with USB 28cfm exhaust fan
- 1 large secure drawer for peripheral device or document storage
- Various monitor size and configuration options

Mobilizing CLINiC™ cart platforms that enable doctors and clinicians to connect with their patients.

Wall Mount Solutions Featuring CLINiC™

Fluid™ Arm HD

- Easily adjusts for sitting or standing needs for physicians
- Monitor pivots to allow patient interaction
- 40lb capacity supports most monitor configurations
- Antimicrobial touch points
- Internal cable management allows for clean, organized look
- Stows out of the way at a 7" depth
- 3 track options: 48" and 32" (standard)

Fluid™ is a trademark of Knape & Vogt

Tandem Arm™

- Dual pivot points maximize rotational range of motion
- 25lb capacity supports most monitor configurations
- 15" of locked position height adjustment with comfort grip actuator
- Keyboard drawer extension with integrated wrist rest reduces strain
- Work Station folds to within 7- 3/8" from the wall for compact storage
- Dedicated channels for cable management improve installation and conceal cables

Wall mount solutions featuring the CLINiC™ offer flexible configurations that connect doctors and clinicians to patients.

CLINiC™

Telehealth

Overview
The CLINiC™ is an affordable purpose built Telehealth consultation device that provides an intuitive clinical user interface across a variety of form factors, and use cases.

Standards Based
Capable of supporting synchronous audio, video and content sharing (PACS, EHR, Scopes/Peripherals) via standards based SIP protocol. Reduces organizational risk by eliminating proprietary architectures.

Intuitive Interface
Standardized user interface, purpose built for a medical environment and designed with a focus on ease of use. Significantly reduces training time and increases end user adoption.

Flexible Deployment Options
Perfect for deployments where space is a premium and can be used in a variety of Telehealth applications by simple attachment to existing medical carts, integration into new medical carts, wall mounted arms and can also be deployed as a standalone desktop unit. Allows organizations to pick the best solution to meet the clinical use case, the physical environment and budget versus the traditional one size fits all approach.

Easily Deployed and Supported
Unit leverages the VESA Mounting Interface Standard which means it can be installed and replaced in almost any environment within minutes. Reduces both capital acquisition and operating expense costs.

Eagle Eye Acoustic Camera

Icon-Driven Control Panel

Optional Pan Tilt Zoom Cameras
