CAPSAHEALTHCARE

Automated Narcotics Storage, Access, & Tracking

Ask A Director of Nursing or LTC Administrator About NexsysADC™

Q1: How do you dispense Stat/1st doses? In a locked 'tackle box'?

Q2: Is drug diversion a concern?

Q3: If you considered Automated Dispensing Cabinets (ADCs), were they too expensive or complex?

Q4: Do you frequently find you don't have the necessary 1st dose on-hand, necessitating an emergency call to the pharmacy?

Assurance For LTC Facilities

When medications are stored in NexsysADC, you always know the inventory, who is accessing the cabinet, and what is dispensed for a specific patient or procedure. NexsysADC is the practical solution to:

- Eliminate the problematic tackle box E-Kit
- Increase visibility to inventory onhand
- Deter internal diversion, especially controls
- Ensure medications are onsite when needed (Stat doses)
- Promote efficient patient care

The Practical ADC

NexsysADC, from Capsa Healthcare, is the simplest system to closely manage the onsite storage of controlled or high-value medications and supplies (including Stat/1st doses).

- Costs 50% to 70% less than other automated dispensing cabinets
- Limits & tracks access to narcotics and high-value meds and supplies
- Main cabinet and tabletop sizes
- Select from 4 popular configurations -- See p. 3

NexsysADC™

Automated Narcotics Storage, Access, & Tracking

How NexsysADC™ Works

NexsysADC™ is available as a free-standing 10-tier main cabinet or a countertop size 4-tier cabinet. In either size, the ADC will store, track, and dispense controlled medications, and high-value meds and supplies. Staff member access is controlled with biometric, or proximity card, or typed ID. With intuitive software and pick-to-light technology, the nurse finds the exact medication or supply needed for the patient, which automatically logs the transaction and updates the onboard inventory.

Each NexsysADC has 2 or 3 Storage Zones for controlled and high-value medication and supplies

❶ Controlled Medications
Controlled and high-value medications are safely guarded in CAMs (controlled access modules) with tamper-evident locking lids. Choice of 3 CAM layouts.

❷ Open Cell Medication Bins
Routine meds and high-value meds are efficiently managed in dividable, locked open-matrix bins, with pick-to-light guidance. Each bin configurable for 1–14 items.

❸ Bulk Supplies & Kits
Bulk supplies and larger items are stowed neatly in configurable, locked supply drawers, with pick-to-light guidance. Each drawer configurable for 1–16 items.
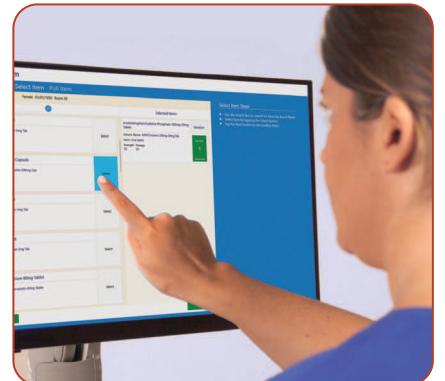

NexsysADC™ CAMs & Features

Unique CAMs are at the heart of NexsysADC to protect controlled medications. Illuminated prompts direct you to the correct dose. Includes clear locking lids and tamper evidence.

Depending on your configuration (p. 3), CAMs hold 11, 13, or 19 SKUs of any dosage form (oral dose, syringe, ampule, vial) in individual cells.

NexsysADC is simple to navigate, with clean, bright software design and intuitive user interface.

New! 4 NexsysADC Configurations

If these configurations don't suit your needs, contact Capsa for a custom layout
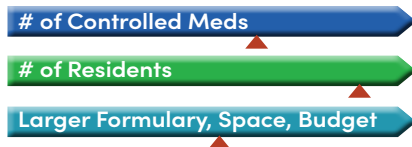

Configuration 1, Main Cabinet

For Controlled Meds: CAM-11 holds 11 SKUs

For Non-Control Meds & Supplies: Two 3-tier dividable open-matrix inserts (18 bins); one 3" and one 6" dividable, open-matrix supply drawers (self-configurable, total storage up to 284 SKUs)

Part # NX-MAINBDL-1

# of Controlled Meds
# of Residents
Larger Formulary, Space, Budget

Configuration 2, Main Cabinet

For Controlled Meds: CAM-11 holds 11 SKUs; CAM-13 holds 13 SKUs

For Non-Control Meds & Supplies: Two 3-tier dividable open-matrix inserts (18 bins); one 6" dividable, open-matrix supply drawer (self-configurable, total storage up to 268 SKUs)

Part # NX-MAINBDL-2

# of Controlled Meds
# of Residents
Larger Formulary, Space, Budget

Configuration 3, 4T Countertop Cabinet

For Controlled Meds: CAM-11 holds 11 SKUs

For Non-Control Meds & Supplies: One 3-tier dividable open-matrix insert (9 bins, self-configurable, total storage up to 126 SKUs)

Part # NX-4TBDL-1

# of Controlled Meds
# of Residents
Larger Formulary, Space, Budget

Configuration 4, 4T Countertop Cabinet

For Controlled Meds: CAM-19 holds 19 SKUs; CAM-11 holds 11 SKUs

For Non-Control Meds & Supplies: One 2-tier dividable open-matrix insert (6 bins, self-configurable, total storage up to 84 SKUs)

Part # NX-4TBDL-2

# of Controlled Meds
# of Residents
Larger Formulary, Space, Budget

CAM-11
11 cells
Included with configuration 1, 2, 3, 4

CAM-13
13 cells
Included with configuration 2

CAM-19
19 cells
Included with configuration 4

Specifications & Components

4T Cabinet Size
23.5"(w) 20.4"(d) 17.7"(h) with 14" touchscreen monitor. Approximately 100 lbs. empty. 4 Tiers

Main Cabinet Size
25"(w) 20.4"(d) 43"(h) with 22" touchscreen monitor. 145 lbs empty. 10 Tiers

Includes:
Biometric scanner, keyboard, barcode scanner for medication verification, interfacing capability, implementation & training
